DETAILED ACTION

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Nate Rees on 03/09/2012.

The application has been amended as follows:

In the claims

1. (Currently Amended) A high-speed mail processing system having a conveyor system for transferring a plurality of mail pieces among two or more mail processing components and a controller for directing the operations of the components, the system comprising:

a postage computing device for separately calculating postage value due for each individual mail piece of said plurality of mail pieces, said postage computing device operable to use said calculated postage value to generate an information based postage indicia for a mail piece of said plurality of mail pieces in parallel with the mail piece of said plurality of mail pieces being physically created and processed by at least one mail processing component of said two or more mail processing components;

a postage application printer positioned to print said information based postage indicia on the mail pieces piece of said plurality of mail pieces that is being moved by the conveyor system, wherein said information based postage indicia is available for

printing by said postage application printer at the time the mail piece of said plurality of mail pieces arrives at said postage application printer; and

a computer processing system for storing information related to the processing of each individual mail piece of said plurality of mail pieces and for providing the controller with the processing information;

wherein said controller tracks the position of each individual mail piece of said plurality of mail pieces and instructs components of said high speed mail processing system regarding the processing of said each individual mail piece of said plurality of mail pieces at said components.

Claim 11. (Currently Amended) A method for applying postage to mail pieces in a high- speed mail processing system comprising:

receiving processing instructions that identify how each mail piece of said mail pieces should be processed;

controlling the components of the high-speed processing system to comply with the processing instructions; wherein said controlling includes tracking the position of the mail pieces and instructing components of said high speed mail processing system regarding the processing of the mail pieces at said components;

individually calculating a postage value for said each individual mail piece of said mail pieces; and

generating an information based postage indicia, using said calculated postage value, for an individual mail piece of said each mail piece of said mail pieces in parallel with the individual mail piece being physically processed by one or more of the

components, including at least one of a folder and an inserter, of said high-speed mail processing system; and

printing the calculated postage value on each mail piece of said mail pieces, wherein said information based postage indicia is available for printing at the time the individual mail piece of said each mail piece of said mail pieces arrives at a printer for said printing.

Claim 19. (Currently Amended) A system for processing mail pieces comprising: means for receiving processing instructions that identify how each mail piece should be processed;

means for controlling the components of a high-speed processing system in accordance with the processing instructions wherein said means for controlling includes a means for tracking the position of the mail pieces and instructing components of said high speed mail processing system regarding the processing of the mail pieces at said components;

means for calculating a postage value for each individual mail piece based upon a count of the number of documents included in each said individual mail piece and weights of the documents, said postage value calculated without weighing the individual mail piece, using information from said processing instructions, and in parallel with the high-speed processing of said mail piece; and

a printer controlled in accordance with the processing instructions, for printing the calculated postage value on each mail piece; wherein said calculated postage value for

a mailpiece of said each mailpiece is available for printing by said printer, when the mailpiece arrives at said printer.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The claims are allowed based on the reasons stated in the BOARD OF PATENT APPEALS AND INTERFERENCES decision dated 11/22/2011, namely the failure of the cited references to teach the parallel processing and postage generation of claims 1, 11 and 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
